A Family Business : 60 years history

Since 1956, BERNHARDT has been developed packing solutions through two complementary business :

- The study and the realization of packing machines
- The design and the manufacturing of flexible packaging

OUR PACKING MACHINES :

- **Sealers :**
 - Impulse sealers (handsealer, laboratories sealers, large size bags sealers)
 - Constant heating sealers for hazardous areas (ATEX certification)
- **Fillers :** to fill powder in bags, bag in box, octabins, drums, containers, FIBC's
- **Vacuum sealers / vacuum pipe / vertical vacuum chamber :** with or without gas flushing
- **Semi-Automatic Packing lines :** adapted lines to small and medium cadence when weighing precision is requested as well as easy cleaning and ergonomics.

This is a non exhaustive list and our design office is at your disposal to study your « special » packing lines.

OUR PACKAGING RANGE :

We develop and supply packaging with high protection materials and/or with strong mechanical resistance.

We source the best multi-layers films, either laminated or co-extruded to protect the packed products from moisture, oxygen ,UV light, smells...

FIELDS OF APPLICATION :

Food-processing ingredient, Pharmaceutical products, Chemical products.

OUR DIFFERENT PACKAGINGS :

- Bags for SOLID products from 0.5L to 2000L : stand-up bags, bags with side gussets, solution carton & bag, aluminium liners for FIBC's,
- Pouches for LIQUID and PASTY from 500ml to 1000L : stand-up pouches, pouch with side gussets, special pouch, big size pouch.

OUR QUALITY COMMITMENT :

Since 2004, BERNHARDT has been involved in a environmental process and has obtained the ISO 14001 certification.

OUR INTERNATIONAL PRESENCE

THEY TRUST IN US :

OUR QUALITY COMMITMENT

Since 2004, BERNHARDT has been involved in an environmental process and has obtained the ISO 14001 agreement.

This positive experience allows us to reassert our organization and to evaluate our practices as part of our continuous improvement. To this end, the company must fulfil with the legal requirements of the ISO 9001 et 14001 agreement.

The QUALITY and ENVIRONMENT process is present in any stage : from the raw material purchasing to the delivery of finished products but also in transports and supports departments.

PACKAGING DEPARTMENT

STAND-UP POUCHES : a reply to rigid packaging

BERNHARDT offers a wide range of **FLEXIBLE POUCHES** adapted to **LIQUID** or **POWDER** products.

Their design has been studied to propose several advantages such as : a combination of high quality sealing and raw material to get a **VERY HIGH RESISTANCE**, an **INCOMPARABLE STAND UP POSITION** and an **OPTIMIZATION** on the shelves owing to the side gussets.

The **FIELDS OF D'APPLICATION** are **WIDE** : **food stuffs**, **chemical**, **pharmaceutical products**, **cosmetics**.

1 to 5 LITRES

BARRIER PACKAGING : SIZE 1L to 2000L

Several layouts:

3 seals bags

Bags with side gussets

Material:

Two layers / Triplex / Quadruplex

POUCH FOR LIQUID PRODUCTS : SIZE 1L to 200 L

Several layouts :

4 seals pouches with spouts, pillow shape

Filler

THE EFFICIENT PACKAGING SOLUTION FOR YOUR SENSITIVE PRODUCTS INTO FIBC'S :

TIGHTNESS :

Gas flushing & vacuum → protected product
Sealed closure → inviolability

PRODUCTIVITY :

All in one machine

AUTOMATION : Data traceability

- * STAINLESS STEEL conception
- * Compliant with BPF/ clean rooms
- * Suitable to any size of FIBC's
- * ATEX option

One of our customer has chosen this solution to preserve the integrity of its products to export towards Asia.

FILLERS 1KG to 25KGS

FIELDS

- Difficult pulverulent powders (sticky, stuffing, difficult flow)
- Food stuffs, chemical or pharmaceutical products.

ADVANTAGE

- Weight accuracy and running.
- Easy cleaning and dismantling.
- Possibility of filling under inert gas flow.

VERTICAL VACUUM CHAMBER

ADVANTAGE

- Vacuum and sealing quality.
- User-friendliness.
- Easy adjustment and maintenance.

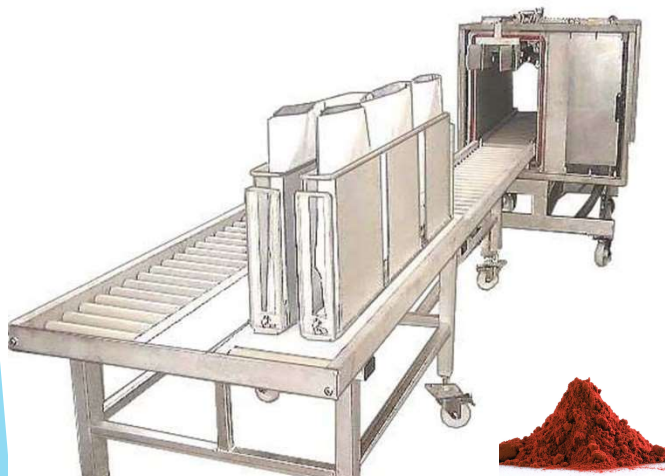

This vacuum method is dedicated to package sensitive products. It allows the product to keep its original qualities (taste, colour, odour...).

FIELDS

For one of our customers leader in the food-processing industry in Eastern Europe (chicken cuts).

To package krill powder : equipment established inside a factory ship.

DESIGN OFFICE

The Design office develops and models all the processes allowing the manufacturing of your machines.

Our engineers develop innovative solutions adapted to the specificities of each project.

AFTER-SALES SERVICE

Our after-sales service takes care of your packaging line throughout its life.

Whether it be for regular maintenance or be it for changes and updatings.
