

Pulsed Light Sterilization

PRESS RELEASE

**INTERPACK 2017**

## 100% CHEMICAL FREE PACKAGING STERILIZATION

Claranor will be present for the 4th time at the Interpack.

**We will showcase this year our chemical-free latest innovations to sterilize packaging.**

For the beverage industry :

- **Claranor Essential**, a very compact and cost-attractive cap sterilization solution, designed for low and medium speed lines.
- **The Full cap sterilization**, a solution to address the cross-contamination issue for the ESL products (> 60 days)

For the dairy industry

- **The Puls'Combi FS**, which is a combined decontamination of cups and lids.

On the Claranor's booth, visitors will have the opportunity to see 2 cup sterilizers already sold to dairies in France (4 lanes) and in Turkey (12 lanes), to be installed on Doselec filling lines.

*Pictures legend: Claranor Puls'Full cap, Essential, Cups sterilization commissioning*

The **compactness of our unit makes it easy to integrate on existing line. Using no water and no chemicals**, our decontamination solutions **meet the industrial expectations in term of germicidal effects without the drawbacks of the chemical and the irradiation solutions.**

With over **250 production lines equipped worldwide**, our Pulsed light solutions: cap, preform, cup and lid sterilizers are now **acknowledged by the most famous food and beverage companies as well as the main equipment manufacturers**.

This exhibition will be a great opportunity for food and beverage manufacturers as well as for OEM to discuss their packaging sterilization projects with Claranor team and Löhcke, its exclusive distributor in Germany.

### **About CLARANOR**

---

CLARANOR is based in Avignon, France, and employs 30 people. The company designs and manufactures pulsed light units for inline packaging sterilization, using no chemical disinfectants nor water. Its solutions are dedicated to manufacturers of sensitive food products, especially beverages and dairy products. CLARANOR has sold more than 250 sterilization solutions throughout the world in the last 6 years, directly to industrial end- users, as well as through manufacturing partners who sell complete production lines. **Learn more at [www.claranor.com](http://www.claranor.com)**
